

What do you know? Science

Living Things and their Habitats

Year 1
Year 2
I identify things that are living, dead and never lived.
I know how a specific habitat provides for the basic needs of things living there (plants and animals).
I identify and name plants and animals in a range of habitats.
I match living things to their habitat.
I know how animals find their food.
I name some different sources of food for animals.
I know and can explain a simple food chain.
Year 3
Year 4
I group living things in different ways.
I use classification keys to group, identify and name living things.
I create classification keys to group, identify and name living things (for others to use).
I know how changes to an environment could endanger living things.
Year 5
I know the life cycle of different living things, e.g. mammal, amphibian, insect and bird.
I know the differences between different life cycles.
I know the process of reproduction in plants.
I know the process of reproduction in animals.
Year 6
I classify living things into broad groups according observable characteristic and based on similarities and differences.
I know how living things have been classified.
I give reasons for classifying plants and animals in a specific way.
